Health and Social Wellbeing Improvement

ALCOHOL MOT PART ONE

Is your drinking putting you at risk?
Most adults who live in Northern Ireland drink some alcohol. Many drink at a level that does not put their health at risk, and if you drink, you may think you are one of them. To find out for sure, use the alcohol unit guide to answer the three questions below.

ALCOHOL UNITS GUIDE

Item	Units
Pint of beer (4%)	= 2.3 units
Pint of cider (5%)	= 2.8 units
Alcopop (5% / 275ml)	= 1.4 units
Can/bottle of beer (5% / 330ml)	= 1.7 units
Spirits eg vodka/whisky (40% / 35ml)	= 1.4 units
Bottle of spirits (40% / 700ml)	= 28 units
Bottle of wine (12% / 750ml)	= 9 units
Small pub bottle of wine (12% / 187.5ml)	= 2.3 units

Please enter your score for each question and add up to get your sub total.

	Scoring system					Your overall score
	0	1	2	3	4	
1 How often do you have a drink containing alcohol?	Never	Monthly or less	2-4 times per month	2-3 times per week	4+ times per week	
2 How many units of alcohol do you drink on a typical day when you are drinking?	1-2	3-4	5-6	7-9	10+	
3 How often have you had six or more units if female, or eight or more if male, on a single occasion in the last year?	Never	Less than monthly	Monthly	Weekly	Daily or almost daily	
SUB TOTAL:						

Your overall score for this section
If you are a man and scored four or less, or if you are a woman and scored three or less, you are a low-risk drinker. Aim to keep your drinking at these low levels. If you are a man and scored five or more, or if you are a woman and scored four or more, your drinking may be putting your health at risk.

Project supported by the PHA

Now please answer the questions overleaf to find out more.

The Alcohol MOT is designed to support those working in primary care to carry out alcohol brief interventions. There is extensive evidence to show that primary care-based brief interventions are very effective at reducing drinking at both hazardous and harmful levels. The MOT enables patients to work out if they are drinking at hazardous or harmful levels, and is designed so that a practitioner can work through it with a patient, or a patient can work through it alone.

As with most activities, drinking alcohol carries a degree of risk. A set of guidelines, developed by the UK Chief Medical Officers, exists to help people understand the risks alcohol may pose to their health and to help them make decisions in light of the risks. The guidelines can be viewed at www.pha.site/alcohol-CMOs-report
