[Service Development and Screening](#)

When a woman has been diagnosed with cervical cancer, a review is carried out of her screening history to ensure that all steps of the screening process have been followed and to help identify any improvements that could be made. This leaflet explains the review process and provides contacts for more information.

A large print accessible Word version of this leaflet is available below.

Please note the translations are of the 2020 version of this leaflet.

An FAQ document with further information about the review process is also available below.

Details
