[Health and Social Wellbeing Improvement](#)

This leaflet explains how to recognise changes to your skin that may indicate the development of skin cancer. It also outlines how to protect your skin in the sun to minimise the risk of damage.

It was produced and distributed to participating pharmacies as part of the Living Well campaign, which covers up to six health promotion topics each year. Living Well campaign topics are agreed between the HSCB, Community Pharmacies NI and the PHA. The original leaflet was created as part of the [Care in the Sun](#) campaign, which was a partnership between the PHA and Cancer Focus.
